

Wholesale **W** Electric

Commitment Without Compromise

Family Owned Since 1949

Who Are We?

Wholesale Electric is a leader in the electrical distribution industry, providing high-quality products and comprehensive services for the industrial and commercial markets. Founded in 1949, the Houston-based company has expanded to become a global provider, operating worldwide and serving markets domestically and internationally. Much more than a products distributor, Wholesale Electric provides customized solutions and services designed to ensure that projects are completed on-time and within budget.

WHO DO WE SERVE?

Wholesale Electric provides comprehensive services for the following industries:

- Petrochemical
- Refining
- Oil & Gas
- Industrial Construction
- Commercial Construction
- MRO
- Marine
- OEM
- Utilities
- Property Management
- Government

Wholesale Electric is able to service companies of any scope and scale, fulfilling national and international contracts, as well as meeting local needs.

WHY CHOOSE WHOLESAL ELECTRIC?

Experience

Founded in 1949, Wholesale Electric has years of experience providing quality electrical supplies and services to a variety of industries worldwide. Today, we are a leader in the electrical distribution industry.

National and International Expertise

Headquartered in Houston, TX, Wholesale Electric operates 16 domestic locations and 6 international locations. We have the unique capabilities to provide international, national, and local services. Our work is everywhere from the tallest buildings in downtown Houston to petrochemical and refining complexes along the Gulf Coast, Mexico, Singapore, Yemen, Saudi Arabia, and more.

Industry Reach

Wholesale Electric designs customized solutions across a variety of industries. Regardless of your project nature or scope, Wholesale Electric can design a solution tailored to meet your specific needs.

Comprehensive, Streamlined Solutions

Our services extend far beyond product distribution. From product purchasing, delivery and warehousing, equipment modification and fabrication, systems installation, material management, and more; Wholesale Electric provides total project management designed to increase project efficiency, minimize material waste, and reduce overall material cost. Our services provide clients with total visibility throughout the project lifecycle.

CONSTRUCTION MATERIALS MANAGEMENT SYSTEM (CMMS)

- Comprehensive advanced material management system designed to increase the efficiency and cost-effectiveness of large construction projects by integrating critical project functions, including material identification (MTO's - Material Take-Offs), engineering, purchasing, procurement, warehousing, delivery, construction, accounting, vendors, and real-time reporting.
- On-demand order fulfillment minimizes project downtime and reduces overall material surplus and cost.
- Total project management provides services for the lifecycle of the project. Features include an inside project coordinator, a field project coordinator, material ordering schedule integration, summary billing, and more.

MODIFICATION SHOP

- In-house modification shop provides custom solutions for projects requiring product fabrication or adjustment.
- Experienced technicians have the capabilities to customize a range of products, including pneumatics, controls, and equipment components.
 - Advanced technology and expertise ensures all equipment is fabricated and/or modified to comply with delivery requirements, reducing lead time and facilitating on-time project completion.
 - Modification shop is ISO 9002 certified.

CONSIGNMENT INVENTORY SYSTEM

- Our Consignment Inventory System increases project efficiency and cost-effectiveness by placing products in a client's on-site inventory and summary billing for the materials after consumption, not upon delivery.
- Facilitates enhanced project productivity by providing a steady supply of required materials, ensuring that the correct material and quantities required for completing the project or maintaining the manufacturing process are on-hand.
- Allows for the management and replenishment of high-volume items, giving buyers the ability to concentrate on their primary objectives.

BUSINESS CONTINUITY PLAN

- Advanced continuity plan designed to reliably support branch operations and employees in the event of a disaster.
- Internet-based computing environment designed to ensure 24/7/365 system availability, including complete system redundancy.
- Our disaster recovery planning allowed uninterrupted service to our customers during Hurricanes Katrina, Rita, and Ike in 2005 and 2008, respectively.
- Capabilities include back-up inventory, emergency power generation at all Wholesale facilities, as well as a back-up natural gas generator at the Corporate Office.
- Our IT hardware is housed in two separate Tier 3 co-location facilities thus ensuring we are operational in any disaster scenario.
- Each office location is equipped with multiple broadband Internet connections incorporating different technologies and each facility has redundant hardware on site for all critical communication paths.
- Wholesale Electric maintains its own fleet of delivery trucks, portable gas and diesel containers, as well as potable water containers.

VOICE AND DATA COMM. SERVICES

- Our voice and data comm services are designed to create a comprehensive telecommunications infrastructure or enhance your existing one.
 - Comprehensive voice, data, video, and electronic communications services aim to completely encompass all aspects of your telecom operations.
 - Advanced product solutions are designed to streamline your operations, including the ability to place an order, take a delivery, and receive one invoice.
 - In-house RCDD specialist provides expert knowledge of the low voltage, voice, and data industry.

SWITCHGEAR SERVICES

- Efficient, customized solutions for any switchgear problem, designed to minimize system downtime and increase worksite productivity.
- Capabilities to work on any project, regardless of scope, including bringing systems back online, renovating existing systems, designing new construction, and more.
- Our specialists can assist in installing switchgear assemblies, and train your staff regarding its operation.

SYSTEM SOLUTIONS

- Our in-house programmers have worked together with customers to develop a system that helps reduce costs, improve efficiencies, and increase productivity.
- This web-based, real-time enterprise resource planning (ERP) system integrates all facets of our operation including financials, sales, inventory management, and distribution.
- Our innovative Material Management System (MMS) ensures that our industrial and commercial clients receive the correct material within the required timeframe, keeping your project on-track and reducing operating costs.
- Our advanced Construction Materials Management System (CMMS) is the most sophisticated software in the industry for managing the materials procurement, handling, and storage process for major construction projects worldwide.
- WEStore, Wholesale Electric's electronic store, allows seamless communication with our customers' computer systems.
- Our EDI Integration combines with both proprietary and non-proprietary electronic data interchange into all processes. This allows us to electronically enter price catalogues, order entry, purchasing, expediting, invoicing, and electronic funds transfers.
